

Secure, Compliant, and Free RTC Disclosure with Rapid

A trusted, controlled environment for fast, risk-free sharing with insurers

Police disclosure teams are under increasing pressure to provide Road Traffic Collision (RTC) reports quickly, securely, and in full compliance with policing data-protection standards. Traditional delivery routes - postal services, email, and external file-transfer tools introduce avoidable security risk, administrative burden, and cost.

Rapid, developed and operated by NetWatch, offers a single, secure, and completely free solution for police forces - enabling fast, compliant delivery of RTC disclosures directly to insurers through a controlled, auditable environment.

A Simpler, Safer Way to Manage Disclosures

Designed to reduce organisational risk while streamlining day-to-day disclosure work, Rapid makes the entire process faster, safer, and more controlled.

How It Works

1. Log in securely via MFA or Microsoft Entra ID SSO
2. View all insurer requests through a centralised dashboard
3. Upload the report - Rapid manages secure delivery, audit logging, and notifications automatically

Why Police Forces Choose Rapid

Enhanced Security & Compliance

- Eliminates risks associated with email and postal delivery
- Role-based access ensures only authorised staff can access files
- Full, immutable audit trail for every action and access point
- Fully compliant with GDPR and the Data Protection Act 2018
- All files delivered within a secure, controlled environment

Reduced Organisational Risk

- No lost, delayed, or untracked post
- Prevents misaddressed or insecure emails
- Maintains a clear, continuous chain of custody for evidential material
- Reduces reliance on uncontrolled third-party tools

Operational Efficiency

- Single dashboard to manage all RTC requests from insurers
- Upload and securely deliver files in seconds
- Automatic confirmation of receipt
- No need for manual monitoring, chasing, or duplicate sends

Cost Savings for Forces

- Rapid is provided to police forces at no cost, with no procurement complexity
- Removes postage, courier fees, and paid third-party file-sharing tools
- Reduces administrative workload
- Fewer inbound enquiries regarding report status

Trusted, Proven, Police Ready

Rapid is a **NetWatch** solution, built in the UK specifically for UK policing and backed by the highest standards of information governance, security assurance, and operational resilience. With zero cost to forces and a straightforward onboarding process, adoption is secure, compliant, and frictionless - enabling disclosure teams to work more efficiently while protecting sensitive data at every stage.
